

Eutroniks Hour Meter Square Type

This hour meter is mechanical type. Widely used in control panel for process control applications. The device accumulates the total operating time of the equipment under observation. The max accumulation or reading is 11 years. Due to its mechanical nature, the device can maintain the data even after a power cut or loss of auxiliary supply.

Type	Hour Meter
Item Code	BZ142-1
Operating Voltage	AC 24,48,110,127,220,240,380V
Frequency	50Hz
Time Range	0-99,999.99Hours
Dimensions	48x48x40 mm
Net Weight	50 grams
Mounting	Insert Type

Dimensions (mm)
